DETAILED ACTION

Response to Remarks

1. Applicant's remarks as filed on 8/25/05 have been fully considered but they are not persuasive.

The Applicant presents argument of which Kato's reference fails to mention the circuits being provided on separate substrates, thereby not establishing a prima facie case of obviousness.

However, after careful scrutiny of Kato's reference, the Examiner must respectfully disagree, and maintain the grounds of rejection for the reasons that follow.

In response to the argument, Kato's drawing on Fig. 8C clearly shows a general purpose video processing circuit (Fig. 8C, 30) and the endoscopic function adjusting circuit (36) being provided in two-substrates in a common signal processing apparatus (12).

The Applicant further argues that the idea of every circuit being blocked off by a square or in a rectangular enclosure (see drawing) being represent a separate circuit board does not make any sense, nor is it correct to make such an assumption.

However, in contrast to the Applicant's assertion as stated above, the Applicant's invention also shows on Fig. 2, a general purpose video processing circuit (Fig. 2, 30; Rectangular enclosure) and the endoscopic function adjusting circuit (31; Rectangular enclosure) being provided in two-substrates in a common signal processing apparatus (29; Square enclosure), which has substantially the same (drawing) layout/configuration as the Kato's reference.

Therefore, it would have been obvious to a person of ordinary skill in the relevant art employing an endoscope apparatus as taught by Nakamura et al to incorporate the Kato's teachings as above for synchronization of a timing signal as well as the convenient layout of the video processing circuit and the function adjusting circuit, thereby adverse effect of delay and deterioration of signal during transmission through the signal line are compensated. Henceforth, this office action has established a prima facie case of obviousness.

Art Unit: 2613

Therefore, Applicant's argument is considered moot at least based on the Examiner's responses as discussed above.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al (5,627,583) in view of Kato (4,831,444) as previously discussed in the last Office action as filed on 2/01/05.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
